

## **Medical Sharps (needles) Collection**

In an effort to protect individuals and the environment, the Carmel Water-Waste water Utility Household Hazardous Waste Collection Center is now collecting medical sharps (needles) from customers who generate this material when administering home medications.

Working in conjunction with Carmel St. Vincent Hospital, sharp (needle) collection containers are available at the Collection Center at no cost to our Utility customers. Once the sharps containers are filled, they can be brought back to the Collection Center for proper disposal.

Sharps materials will be accepted only if they are properly packaged. For further information, please call the Collection Center at 571-2624.
